27 November 1968

MEMORANDUM FOR: Director of Special Activities

25X1A2g SUBJECT : Status of [redacted] Program  
REFERENCE : Memo for Record, IDEA-0822-68, dtd  
28 October 1968

1. This memorandum is for your information in response to your note of 20 November.

25X1A5a1 2. Subsequent to the meeting of 25 October (see ref attached) a number of conversations have been held between [redacted] and myself. In addition, [redacted] has met with [redacted] on a revised proposal.

25X1A5a1

5X1A2g 3. The current proposal contemplates that all modification would be done on the [redacted] hatch; no modification of the vehicle itself would be required. Approximately ten flights over a period of two and one-half months would be required. Hatches are available for the U-2C, but are in very limited availability for the U-2R. It has been proposed that LAC would do the hatch modification, under [redacted] funding through OSA contracting. [redacted] and LAC met on 25 November to prepare cost estimates on this work.

25X1A5a1

25X1A5a1 4. While my conversations with [redacted] have strongly emphasized that no commitment was being made, he indicated that the Navy considered the informal agreement between Admiral Carmody and [redacted] to be exactly that: an agreement to support the program, at least to the extent of making available the vehicles and needed flying time.

5. A complicating factor in the current proposal concerns the U-2C utilization; projected flights are in the ninth and tenth months of the program, i.e., September and October 1969, for a 1 December 1968 go-ahead, and the "C" may be in storage at that time.

25X1A6a  
25X1A6a      6. Command and Control would be basically at the Detachment. Pilot operations are minimal, and consist primarily of flying appropriate courses near the [REDACTED] [REDACTED], plant of [REDACTED] and reporting position, etc., by voice to the [REDACTED] ground station. Approximately one flight per week would be needed.
